

HOW TO CREATE A PLAYER SHOP?

- Attach a wall sign to one of the sides of a chest or above it, to a wall and set the first line to **:as: .**
- Use **/ashop** command.

HOW TO REMOVE A PLAYER SHOP?

- Use **/aremove** command.
- Right click on a chest.
- You can also destroy a shop chest.
- Uncollected items will be dropped.

HOW TO SELL ITEMS TO PEOPLE IN MY SHOP?

- Use **/asell <price> [<id>]** command. **<price>** must be a positive value. **<id>** can be any valid id of the item or its name. It can contain metadata after a colon and enchants after second colon. Enchants should be separated with a comma. After each enchant you must add a dash, followed by a desired level. (e. g. *diamond_sword:0:16-2,17-3* – remember to add a metadata value, if you want to add enchants. It can be 0.) You can find enchants' ids on Minecraft Wiki. If You don't specify any item id, the command will take the id of the item in Your hand.
- Right click on a chest.
- An offer tag will appear in a chest inventory. When You point it with a mouse cursor, You will see a description of the offer.

- To load items into Your shop, just left click the offer tag (it will take first slot of offered items). Number under the price, will increase. It represents amount of items (and its limit after a slash).
- If You want to take back Your items, just right click the offer tag.
- To remove the offer, click on the item tag holding shift.

HOW TO BUY ITEMS FROM PEOPLE IN MY SHOP?

- Use **/abuy <price> <amount> [<id>]** command. **<price>** and **<amount>** must be a positive value. **<amount>** is an amount of the item you want to buy from players. **<id>** can be any valid id of the item. It can contain metadata after a colon and enchants after second colon. Enchants should be separated with a comma. After each enchant you must add a dash, followed by a desired level. (e. g. *diamond_sword:0:16-2,17-3* – remember to add a metadata value, if you want to add enchants. It can be 0.) You can find enchants' ids on Minecraft Wiki. If You don't specify any item id, the command will take an id of the item in Your hand.
- Right click on a chest.
- An offer tag will appear in the chest inventory. When You point it with a mouse cursor, You will see a description of the

offer.

- To collect items, just right click the offer tag (it will put items into first empty slot). Number under the price, will decrease. It represents amount of items people sold You.
- To remove the offer, click on the item tag holding shift.

HOW TO DISABLE/ENABLE MY SHOP?

- Use **/atoggle** command.
- Right click on a chest.

HOW TO ADD A SIGN TO MY SHOP?

- You can attach a sign with a shop description to one of the four sides of a chest or above it, to a wall.
- To attach a sign, simply set its first line to **:as:** .
- You can open a shop by right clicking on an attached sign.
- You can destroy any attached sign, if there's at least one more shop sign.

HOW TO SELL OR BUY FROM OTHER PLAYERS' SHOPS?

- Open shop.
- Move a mouse cursor to a desired item.
- If a price is red, it means that if you click this item, you will buy it.
- If a price is green, it means that if you click this item, you will sell it (if you have any item matching this offer in your inventory).
- For a transaction to success, selling person should have an item from the offer, and buying person – enough money. Server Shops have an unlimited amount of items.
- Depends on how You clicked an offer tag, a different amount of item will be sold or bought: left click – 1, right click – 16, holding shift – 64. However You can't buy or sell more than the max. value of the item stack.
